

Phase 3 – Ready for production

Introduction

DMS Import

Onboarding mini guide for System-to-System users

Introduction – Phase 3

Get ready for production

It is not all economic operators who are a part of testing. If you are not, you can skip step 1.

Regardless of whether you plan to test the new system or not before using it, we still recommend that you visit Toldst.dk and sign up for the newsletter and in general investigate if there is anything you should be aware of or if you need to make any changes in the way you work going forward. So, prepare and make sure you are as informed as possible for the use of DMS Import.

Phase 3 covers:

1. **Test workflows in DMS Import TFE (test environment) if coordinated with software vendor**
2. **Set-up system user for production**
3. **Register certificate**

Phase 3 is only relevant if you have not already used H7 in DMS Import. We do recommend that you check your network connection as soon as possible.
