1 Preconditions

To complete the functional test case for “C1 Pre-lodged”, the company must have an established connection to the AS4-gateway, and have a functioning system user to DMS Export, see [Connectivity Guide & System Guide](#).

Furthermore, ensure that you for this test case have the correct URLs, Services, and Actions, as seen below. In place of {CVR} and {UID}, fill out your own CVR and UID in the URL below. While the URLs and Services are the same for all the test cases, the Actions however, will change depending on the test case you are performing, please keep an eye out that you have the correct Action for the test case in hand.

To submit the XMLs for this test case, use the following endpoint:

URL	UFE Service	TFE Service	Action
https://secureftpgatewaytest.skat.dk:6384/exchange/CVR_{CVR}_UID_{UID}	DMS.Export2	DMS.Export	Declaration.Submit

For retrieving the notification, use the following endpoint:

URL	UFE Service	TFE Service	Action
https://secureftpgatewaytest.skat.dk:6384/exchange/CVR_{CVR}_UID_{UID}	DMS.Export2	DMS.Export	Notification

To submit a Goods Presentation XML, use the following endpoint:

URL	UFE Service	TFE Service	Action
https://secureftpgatewaytest.skat.dk:6384/exchange/CVR_{CVR}_UID_{UID}	DMS.Export2	DMS.Export	Declaration.Amend. GoodsPresented

1.1 Process flow

The process flow for a C1 pre-lodged declaration can be seen in Figure 1 below:

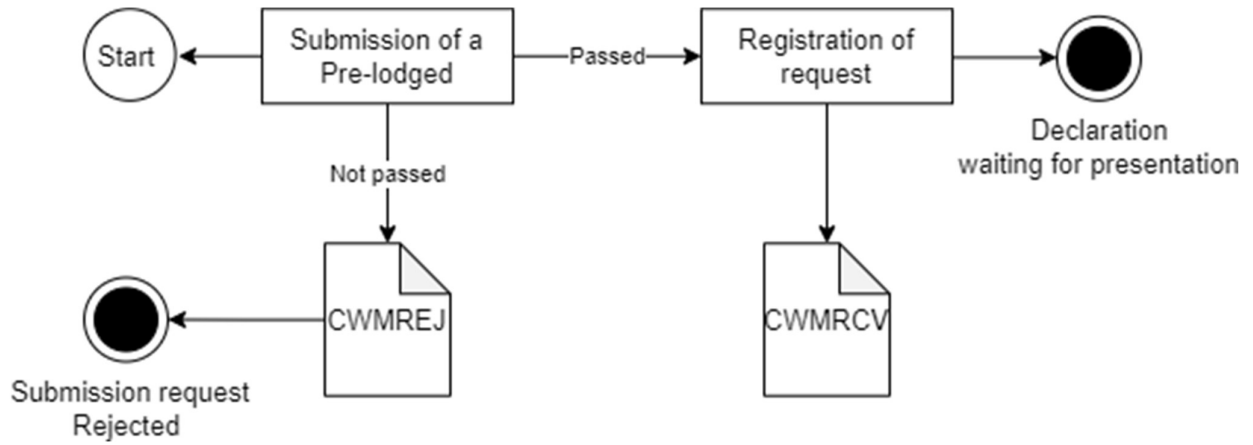

Figure 1: C1 pre-lodged declaration process flow

The full flow for a C1 pre-lodged until clearance can be seen below:

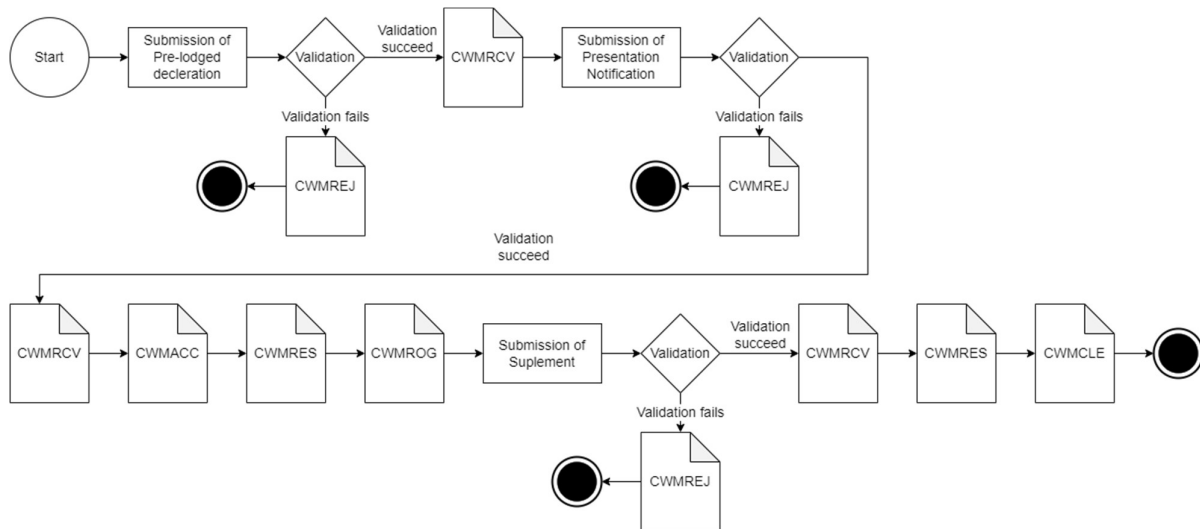

Figure 1: A full C1 pre-lodged declaration process flow

2 Test Scenarios

To complete this test case, test scenario 1 and 2 must be passed successfully. Descriptions and specifics for each test can be found in the coming sections. Be sure to go through the scenarios thoroughly. It is recommended that you use the attached files to test the notifications.

Test no.	Test scenario	Passed/Failed
1	Submit C1 – Pre-lodged declaration, which is accepted	<input type="checkbox"/>
2	Submit C1 – Pre-lodged declaration, which is rejected	<input type="checkbox"/>

2.1 Description of test scenarios

The following sections will describe the aim of each specific scenario and provide the desired results of the test scenarios. It is worth noting that there can be changes in the notifications provided by DMS Export as the solution is still in development.

The purpose of the test scenarios is to ensure your connection to the system, and that you as a company can receive the correct notifications when sending in XMLs. Each step describes what you need to do when going through the test case. For each case there will be an XML available in the same folder where you found this test case document.

For sending in C1 declarations, you will need to have a C512 (SDE) authorization. This is applicable to all types of C1 declarations except for invalidation. For more information, contact TOLDST ServiceDesk.

2.2 Test scenario 1 – Acceptance

The aim of this scenario is to get a notification that the C1 Pre-lodged XML has been accepted.

The following table shows the necessary test steps for completing this scenario as well as expected results. For the first step it is recommended using the provided declaration **XML** found in the **Test Case** folder. Secondly, make sure that your **LRN** is unique, and that the **Submitter** field is correct (this is done by putting your CVR in the **Submitter/Name** and **Submitter/ID** fields).

Step no.	Description of steps	Expected result	Passed
1	Use the provided C1 XML “Test Case – C1 Pre-lodged” found in the test case folder (remember to fill out the LRN and Submitter fields)	Should have the test XML ready for the next step	<input type="checkbox"/>
2	Enter information from section 2.2.1 with the valid data in the element GoodsLocation (16 15 000 000) to ensure acceptance	GoodsLocation (16 15 000 000) element should resemble section 2.2.1	<input type="checkbox"/>
3	Submit the declaration using the conditions found under Pre-conditions	The declaration should be sent to the system	<input type="checkbox"/>
4	Pull the notifications	You should be able to pull notification from the system	<input type="checkbox"/>
5	Registration of submitted declaration by receiving CWMRCV notification	You should get a CWMRCV notification from pre-lodging the declaration	<input type="checkbox"/>

2.2.1 XML example

```
<ns3:GoodsLocation>
  <ns3:Name>DKFDH-0003</ns3:Name>
  <ns3:TypeCode>A</ns3:TypeCode>
  <ns3:IdentificationType>V</ns3:IdentificationType>
</ns3:GoodsLocation>
```

2.3 Test scenario 2 – Rejection

The aim of this scenario is to get a notification that the C1 Pre-lodged XML has been rejected.

The following table shows the test steps necessary to complete this scenario as well as expected results. For the first step it is recommended using the provided declaration **XML** found in the **Test Case** folder. Secondly, make sure that your **LRN** is unique, and that the **Submitter** field is correct (this is done by putting your CVR in the **Submitter/Name** and **Submitter/ID** fields).

Step no.	Description of steps	Expected result	Passed
1	Fill out a C1 XML or use the provided “Test Case - C1 Pre-lodged” XML found in the test case folder (remember to replace the {{LRN}} and {{CVR}} placeholders)	Should have a template XML ready for the next step	<input type="checkbox"/>
2	Enter information from section 2.3.1 with the invalid data in the element Exporter (13 01 000 000) to ensure rejection	Exporter (13 01 000 000) element should resemble section 2.3.1	<input type="checkbox"/>
3	Submit the declaration using the conditions found under Pre-conditions	The declaration should be sent to the system	<input type="checkbox"/>
4	Pull the notifications	You should be able to pull notifications from the system	<input type="checkbox"/>
5	Rejection of a submission of declaration by receiving the CWMREJ notification	Receive notification CWMREJ and pass the test	<input type="checkbox"/>

2.3.1 XML example

Input the wrong CVR number as declarant ID to get a simple rejection.

```
<ns3:Exporter>
  <ns3:ID>DK12345678</ns3:ID>
</ns3:Exporter>
```
