The aim of this document

1

The aim of this document is to give an in-depth description of the different fields and data elements contained in the XSD-files for export based on the European Union Customs Data Model (EUCDM) version 6.1.

The document is structured after the EUCDM grouping of the data elements as well as DMS-specific data fields that are required by the system when using the S2S solution:

- **System-specific fields:** This section includes fields that are needed by the system to recognize what declaration is sent in, who is submitting the declaration, as well other data that is needed to fulfill the desired action.
- **Group 11:** This section contains basic information about the declaration, meaning if the declaration is pre-lodged or a standard and which procedures the declaration should be processed under. All this information influences how the declaration is processed, what kind of business scenario and procedure to be expected and requested.
- **Group 12:** This section is for the submitter to present all other relevant information and documents related to the submitted declaration that is not contained in the data fields. This is especially used for references tracking documents, authorizations and supplying tracking numbers.
- **Group 13:** This section contains information on all parties involved in the export. It is here information on the importer, exporter, declarant, fiscal reference, representative, etc., is provided either by ID or other identifiable information depending on whether the party is a company or private person.
- **Group 14:** In this section valuation information is given, examples of valuations are: taxes, transportation costs, delivery terms, etc.
- **Group 16:** This section contains the location-related information, e.g., where the goods will be or are presented (depending on whether it is a pre-lodged or a standard declaration) as well as the countries involved in the export process.
- **Group 17:** This section contains information regarding which customs offices have handled the goods in the export process.
- **Group 18:** In this section the submitter supplies more detailed information on the goods item(s) such as a weight, description, Taric code(s), etc.
- **Group 19:** This section contains information about the form of transport of goods, e.g., modes, container information, equipment, etc.
- **Group 99:** This section contains other information in the declarations which does not fit into the other above-mentioned groups.

Under each data element in the groups is provided a detailed description on whether the field is mandatory or optional as well as what rules to adhere to depending on the desired business scenario to make use of, and XML-examples are provided to give context.

Information on the EUCDM ID6 reference code is provided to help the reader in seeking further information if needed.

Glossary

2

To make the document shorter and easier to read, some abbreviations are used. Here is a list of the abbreviations used in this document.

Abbreviation	Description	Details
M	Mandatory	The field is mandatory to declare.
O	Optional	The field is optional to declare or should only be declared if relevant information is available.
MC	Conditionally mandatory	The information is mandatory dependent on other information given in the declaration, e.g., type of declaration or commodity code.
DL	Declaration level	The information is given on header level and applies to all the goods items in the declaration.
GSL	Goods shipment level	The information is given on goods shipment level and applies to all the goods items in the goods shipment.
GIL	Goods item level	The information is given on goods item level and applies to only the goods item it is declared under.
C/A	Defines whether an element can be corrected or amended	Yes/Yes means can be corrected and amended. Yes/No means it can be corrected but not amended No/Yes means it can't be corrected but it can be amended No/No means it can't be corrected or amended
EUCDM	European Union Customs Data Model	The European Union Customs Data Model (EUCDM) is the model for Customs trans-European systems such as NCTS, AES, ICS, EOS and for Member States national customs clearance systems
XSD	XML Schema Definition	A document that specifies how to formally describe the elements in an Extensible Markup Language (XML) document. This description can be used to verify that each item of content in a document adheres to the description of the element in which the content is to be placed.
XML	Extensible Markup Language	A simple text-based format for representing structured information, storing, and sending data. It is the file format used to send declarations to DMS.
n/a	Not Applicable	The information does not apply to the given element/declaration.
Requirement Overview	Mandatory / Optional / Conditionally mandatory / Levels / Rules	Defines whether an element is M, O, MC (see abbreviations above) or whether any EUCDM rules apply to the given element in a specific declaration.
M/O	Defines whether a field is mandatory or optional when the main field is in the XML Mandatory/Optional	For a lot of input fields, the sub elements of that field are not always mandatory even though the overall input field is. For example, is Supporting Document which is optional, but when put into to an XML, SequenceNumeric and ID becomes mandatory as the only elements.
ND	Not Determined	The mandatory or optional status of these elements are not yet determined.

Footnotes

3

Throughout the XML-Guide you will see several footnotes, all of these refers to this table. All these footnotes can also be found on EUCDM.

FOOTNOTE	DESCRIPTION
[1]	This information shall not be required in case a customs declaration has been lodged prior to the presentation of the goods pursuant to Article 171 of the Code.
[2]	In the cases where Article 166(2) of the Code (simplified declarations based on authorisations) is applicable, Member States may waive the obligation to provide this information where the conditions prescribed in the authorisations associated with the procedures concerned allow them to defer the collection of this data element in the supplementary declaration.
[4]	This information needs to be provided only where Article 166(2) of the Code (simplified declarations based on authorisations) is applicable; in this case, it is the number of the authorisation for simplified procedure. However, this data element can also contain the transport document number concerned.
[5]	This information is only required where the declaration of placing of goods under a customs procedure is used to discharge a customs warehousing procedure.
[6]	Where the EORI number or a third country unique identification number recognised by the Union is provided, the name and address shall not be provided.
[8]	This information shall only be provided where available.
[10]	Member States may waive this information where the customs value of the goods in question cannot be determined under the provisions of Article 70 of the Code. In such cases the declarant shall furnish or cause to be furnished to the customs authorities such other information as may be requested for the purposes of determining the customs value.
[11]	This information is not to be provided when customs administrations calculate duties on behalf of economic operators on the basis of information elsewhere in the declaration. It is otherwise optional for the Member States.
[15]	Member States may require this information only in cases when the rate of exchange is fixed in advance by a contract between the parties concerned.
[17]	This information shall only be required where the simplified declaration is not lodged together with an exit summary declaration.
[18]	This data element is mandatory for agricultural products with export refunds.
[19]	This data element is mandatory for agricultural products subject to refunds and for those goods which Union legislation requires the origin of the goods in the context of trade with special fiscal territories.
[22]	This information shall only be used in case of centralised clearance.
[23]	This information shall only be used in case the declaration for temporary storage or the customs declaration to place the goods under a special procedure other than transit is lodged at a customs office different to the supervising customs office as indicated in the respective authorisation.
[24]	This information shall only be required in case of commercial transactions involving at least two Member States.
[31]	This information does not have to be provided when export formalities are carried out at the point of exit from the customs territory of the Union.
[34]	Not for use in the case of postal consignments or carriage by fixed transport installations.
[40]	The Member State of acceptance of the declaration may waive the obligation to provide this information where it is in the position to assess it correctly and has implemented calculation routines to provide a result compatible with statistical requirements.
[41]	This data element shall only be used in the context of a supplementary declaration for Entry into the declarant's records.
[60]	This data element is to be provided when an authorisation exists according to the relevant section of Annex A to this Regulation, Title I Chapter 1.
[62]	This information shall relate to the situation at the moment when the declaration is made.
[63]	This information shall be provided for decisions relating to binding information.
[67]	This information shall be required when Region of dispatch is provided.

MRN

C/A	Requirement Overview						XSD-path		
	B1	B2	B3	B4	C1	C2			
No/No	MC DL	MC DL	MC DL	MC DL	MC DL	MC DL	Basepath: Declaration/ID		
EUCDM 6.1	XSD/XML-name						Format	M/O	Comment
None	ID						an..18	MC	

Description:

The MRN is automatically generated following the EUCDM legislation as a unique combination of 18 characters. The MRN is created by the Customs agency and is sent as part of the validation acceptance.

Rules/codes/other relevant information:

This element is only used in the additional messages: correction, amendment, invalidation, goods presentation, and supplementary declarations.

The combination of the 18 characters is, in the time of writing, as follows:

- The last two digits of the year of formal acceptance of the declaration (e.g., '23' for 2023)
 - Consist of 2 digits
- 2. Country where the declaration/proof of the customs status of union goods/notification is lodged (e.g., 'DK' for Denmark)
 - Consist of 2 letters
- 3. Unique identifier based on year and country (e.g., 21DK04K21L01)
 - Consist of 12 alphanumeric characters
- 4. Procedure identifier (see tables below)
 - Consist of 1 letter
- 5. Check digit (e.g., '6')
 - Consist of 1 alphanumeric character

Code	Procedures	Declarations
A	Export only	B1, B2, B3, or C1
B	Export and exit summary declaration	Combinations of A1 or A2, with B1, B2, B3, or C1
C	Exit summary declaration only	A1 or A2
D	Re-export notification	A3
E	Dispatch of goods in relation with special fiscal territories	B4

Code	Procedures	Declarations
J	Transit declaration only	Columns D1 (Special procedure -- Transit declaration) D2 (Special procedure -Transit declaration with reduced dataset – (transport by rail, air and maritime transport)) possibly complemented by D4
K	Transit declaration and exit summary declaration	Combinations of columns D1 or D2 with (A1 (Exit summary declaration) A2 (Exit summary declaration -- Express consignments)) possibly complemented by D4.
L	Transit declaration and entry summary declaration	Combinations of columns D1 or D2 with Entry summary declaration data; possibly complemented by D4.

M	Transit declaration and exit summary declaration and entry summary declaration	Combinations of columns (D1 or D2) with (A1 or A2) and Entry summary declaration; possibly complemented by D4.

Description:

The name and identifier of the company submitting the declaration.

Customs Decision application element 8F for Customs Decision.

Rules/codes/other relevant information:

The references to this element can be found on EUCDM here: <https://eucdm.softdev.eu.com/Archive/EUCDM%206.1/EN/index.htm>

Owner of the Goods (GoodsOwner): Where applicable under the relevant Article, enter the name and address of the non-Union owner of the goods to be placed under the temporary admission

First Place of use or processing (FirstPlaceOfUseOrProcessing): Using the relevant code, enter the address of the place concerned. This information shall only be provided, if, in the context of an application for an authorisation for the use of inward processing or end-use procedures.

Place(s) of processing or use (PlaceOfProcessingOrUse): Using the relevant code, indicate the address of the place(s) concerned.

Customs Office(s) of discharge (CustomsOfficesOfDischarge): Indicate the suggested customs office(s)

Supervising customs office (SupervisingCustomsOffice): Indicate the competent customs office, as provided for in article 1(36).

Period for discharge & Bill of discharge (DischargePeriod & BillOfDischarge): Enter the estimated period expressed in months needed for the operations to be carried out or use within the special customs procedure applied for.

Processed Products (ProcessedProducts): Enter details of all processed products resulting from the operations, indicating the main processed product and the secondary processed products which are by-products of the processing operation other than the main processed product, as appropriate.

Identification of Goods (AuthorisationCode): Enter the intended measures of identification by using at least one of the relevant codes

Economic Conditions (EconomicCondition): The inward or outward processing procedure can be used only where the essential interests of the Union producers would not be adversely affected by an authorisation for a processing procedure (economic conditions).

In most of the cases an examination of the economic conditions is not necessary. However, in certain cases such an examination must be carried out at Union level.

Details of Planned Activities (DetailsOfPlannedActivities): Describe the nature of the planned activities or use (e.g., details of the operations under a job-processing contract or kind of usual forms of handling under inward processing) to be carried out on the goods within the special procedure.

If the applicant wishes to carry out the processing of the goods under inward processing or end-use procedure in a customs warehouse, pursuant to Article 241 of the Code, he shall provide the relevant details.

Where appropriate, indicate name, address and function of other persons involved.

Additional Information (AdditionalInformationText): Enter any additional information, if deemed helpful

Calculation of the amount of the import duty in accordance with article 86(3) of the Code (ImportDuty):

Application:

Indicate ('yes/no') whether the applicant wishes to calculate the import duty in accordance with Article 86(3) of the Code.

If the answer is 'no', Article 85 of the Code must be applied, which means, that the calculation of the amount of import duty is made on the basis of the tariff classification, customs value, quantity, nature and origin of the goods at the time at which the customs debt in respect of them incurred.

Decisions:

In case the holder of the authorisation wishes to calculate the import duty in accordance with Article 86(3) of the Code, the authorisation for inward processing shall provide for that the relevant processed products may not be imported directly or indirectly by the holder of the authorisation and released for free circulation within a period of one year after their re-export. However, the processed products may be imported directly or indirectly by the holder of the authorisation and released for free circulation within a period of one year after their re-export if the amount of import duty is determined in accordance with Article 86(3) of the Code.

11 01 001 000	TypeCode						an..5	M	CL231
11 02 001 000	TypeCode						a1	M	CL042
Description:									
Indicates what type of action is intended: submission of a pre-lodged/standard, a correction/amendment request or an invalidation/invalidation and repayment request.									
Rules/codes/other relevant information:									
For declarations this data element is a concatenation of 11 01 001 000 – Declaration type and 11 02 001 000 – Additional declaration type. For the additional messages this is considered a system specific field. For Codelist information, see codelist excel sheet found on GitHub									
For standard declarations:									
Example:									
For Declaration type ‘EX’ and Additional Declaration Type ‘A’, the input for the data element is ‘EXA’									
For pre-lodged declarations:									
Example:									
For Declaration type ‘EX’ and Additional Declaration Type ‘D’, the input for the data element is ‘EXD’									
For additional messages:									
The codes to declare in this field for additional messages :									
<ul style="list-style-type: none">- ‘COR’ for sending a correction or amendment request to an already existing declaration- ‘INV’ for sending an invalidation or invalidation and repayment request to an already existing declaration- ‘GPR’ for presenting goods to an already existing pre-lodged declaration- ‘SUP’ for supplementing a simplified export declaration									
See the list of explanations in Bilag 3:									
https://skat.dk/getfile.aspx?id=151338&type=xlsx									
Or on EUCDM, using the ID6 number as search:									
https://eucdm.softdev.eu.com/Archive/EUCDM%206.1/EN/EUCDM/Annex-B/e21.htm									
XML-examples:									
<ns3:TypeCode>EXA</ns3:TypeCode> --- for submitting an EXA									
<ns3:TypeCode>EXD</ns3:TypeCode> --- for submitting an EXD									
<ns3:TypeCode>COR</ns3:TypeCode> --- for submitting a correction/amendment request									
<ns3:TypeCode>INV</ns3:TypeCode> --- for submitting an invalidation									
<ns3:TypeCode>GPR</ns3:TypeCode> --- for presenting goods declared on a pre-lodged declaration									
<ns3:TypeCode>SUP</ns3:TypeCode> --- for supplementing a simplified declaration									

Goods item number

Description:									
The additional procedure for which the goods are declared.									
Rules/codes/other relevant information:									
It is mandatory to declare at least one additional procedure but up to two additional procedures can be declared.									
Additional procedure (11 10 001 000):									
Fill in the additional procedure code.									
Valid combinations for requested and previous procedures together with additional procedures can be found here: https://skat.dk/data.aspx?oid=10897									
For CurrentCode (11 10 001 000) footnote [2] applies to C1 declarations.									
For Codelist information, see codelist excel sheet found on GitHub

Description:									
Information relating to a previous document.									
Rules/codes/other relevant information:									
If one subfield is filled, all subfields must be filled. For relevant codes to fill in CategoryCode and TypeCode , see: https://www.skat.dk/skat.aspx?old=1658884									
SequenceNumeric: To refer multiple documents, repeat this element the required number of times and fill here sequentially starting at 1.									
CategoryCode should be filled according to the ‘Dok kat’-column									
TypeCode (12 01 003 000): For Codelist information, see codelist excel sheet found on GitHub									
LineNumeric (12 01 007 000): Enter the sequential number of the item in the supporting document (e.g., certificate, license, permit, entry document etc.), corresponding to the item in question.									
TypeCode (12 01 002 000): For Codelist information, see codelist excel sheet found on GitHub									
Reference number (12 01 001 000): Can be found here, https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02015R2447-20210315&qid=1666165195727&from=en on page 314 under “12 01 001 000 Reference Number”									
AcceptanceDateTime (15 09 001 000): This element is mandatory for C2									

For **AcceptanceDateTime (15 09 001 000)** footnote **[41]** applies to **B1, B2, B4** and **C2** declarations.

Measurement Unit and Qualifier (12 01 005 000)

For Codelist information, see codelist excel sheet found on [GitHub](#)

Description:

Information about the place where the goods are located

Rules/codes/other relevant information:

Using the relevant codes, enter the location where the goods may be examined. This location shall be precise enough to allow customs to carry out the physical control of the goods.

Only one Type of Location (16 15 045 000) is to be used at the same time.

GoodsLocation (16 15 000 000):

This data element can be **supplemented** on a supplementary declaration for **C1** declarations.

The type of location, and how it is declared, is given by the fields: TypeCode and IdentificationType. For declaring the location of goods there are predefined codes for indicating the type of location and how it is declared with specific possible values and combinations:

CountryCode (16 15 018 020):

The countryCodes can be found here <https://skat.dk/data.aspx?oid=1815411>

TypeCode (16 15 045 000)

For Codelist information, see codelist excel sheet found on [GitHub](#)

IdentificationType (16 15 046 000):

For Codelist information, see codelist excel sheet found on [GitHub](#)

Identification (16 15 047 001)

For Codelist information, see codelist excel sheet found on [GitHub](#)

Name (16 15 036 000)

For Codelist information, see codelist excel sheet found on [GitHub](#)

ID (16 15 053 000):

What to fill in this field is given by the Type of location, meaning that if:

- IdentificationType = 'U': this field should not be filled.
- IdentificationType = 'V': this field should not be filled.
- IdentificationType = 'W': this field should not be filled. – currently unavailable
- IdentificationType = 'X': this field can be filled with an additional identifier. – currently unavailable
- IdentificationType = 'Z' this field should not be filled.

The following subelements of **Address (16 15 018 00)** should only be filled when IdentificationType = 'Z':

CityName (16 15 018 022):

City name of the location of goods.

CountryCode (16 15 018 020):

For Codelist information, see codelist excel sheet found on [GitHub](#)

Line (16 15 019 00):

Street name and street number of the location of goods.

PostCodeID (16 15 018 020):

Post code of the location of goods.

authorisationReferenceNumber:

Authorisation number.

Should only be filled when IdentificationType = 'Y'.

CustomsOffice:**identification:**

Customs Office ID (e.g., DK007900).

Should only be filled when IdentificationType = 'V'.

See the list of Customs Office ID's here: https://ec.europa.eu/taxation_customs/dds2/rd/rd_search_home.jsp?Lang=en

latitude:

Latitude coordinate of the location of goods.

Should only be filled when IdentificationType = 'W'. – currently unavailable

longitude:

Longitude coordinate of the location of goods.

Should only be filled when IdentificationType = 'W'. – currently unavailable

EconomicOperator:**identification:**

EORI number of Economic Operator.

Should only be filled when IdentificationType = 'X'. – currently unavailable

XML-examples:

```
<ns3:GoodsLocation>

Group 19 – Transport information (modes, means and equipment)

Container indicator

[illegible]

Mode of transport at the border

C/A	Requirement Overview						XSD-path		
	B1	B2	B3	B4	C1	C2			
Yes/Yes	M GSL [38]	M GSL	O GSL [34]	O GSL	n/a	n/a	Basepath: Declaration/GoodsShipment/Consignment/Border-TransportMeans		
EUCDM 6.1	XSD/XML-name						Format	M/O	Comment
19 03 000 000	Mode of transport at the border						n/a	N/A	Active border transport means
19 03 001 000	ModeCode						n1	M	Mode of transport at the border CL018
Description:									
Details of the active means of transport crossing the border of the Customs territory.									
Rules/codes/other relevant information:									
In the case of combined transport or where several means of transport are used, the active means of transport is the one which propels the whole combination. For example, in the case of a lorry on a sea-going vessel, the active means of transport is the ship. In the case of a tractor and trailer, the active means of transport is the tractor.									
BorderTransportMeans (19 08 000 000):									
This data element can be supplemented on a supplementary declaration for C1 declarations.									
ModeCode (19 03 001 000):									
For Codelist information, see codelist excel sheet found on GitHub									
XML-examples:									
<pre><ns3:BorderTransportMeans> <ns3:TypeCode>1</ns3:TypeCode> <ns3:IdentificationTypeCode>25</ns3:IdentificationTypeCode> <ns3:RegistrationNationalityCode>NO</ns3:RegistrationNationalityCode> <ns3:ModeCode>5</ns3:ModeCode> </ns3:BorderTransportMeans></pre>									

Inland mode of transport

C/A	Requirement Overview						XSD-path		
	B1	B2	B3	B4	C1	C2
