Guidelines for the Printout of the Export Accompanying Document (EAD) during Transitional Period for AES-P1

DOCUMENT TAXUD B1 27.01.202-V.2.0

**THE DOCUMENT IS ACCOMPANIED BY AN XLS FILE CONTAINING A
CORRELATION TABLE BETWEEN AES-P1 DECLARATION MESSAGE (IE515)**

PURPOSE

During transitional period for AES-P1 there will be MSs still operating in ECS-P2 while others have already deployed AES-P1.

Until the last MS have deployed AES-P1, the Export Accompanying Document (EAD) Forms existing in the Transitional Delegated Act (TDA), Annex 9, Appendices H1 (EAD) and H2 (ELoI) may continue to be used in all MSs.

The EAD Forms should be filled in and printed out in accordance with the explanatory notes that can be found in TDA, Annex 9, Appendices A, C1, H1 and H2.

DG TAXUD prepared the embedded correlation table relating the data existing in declaration message (IE515C) in AES with the Boxes existing in the EAD Forms, aiming to provide guidelines to the MSs already operating in AES-P1 during transitional period, on how to print out the data retrieved from the AES in the EAD Form, in which the Boxes still refer to the TDA data elements.

Because the AES-P1 declaration message contains more information than the declaration message of ECS-P2, some of the information will not be printed in the EAD during the Transitional Period.

In principle, all information available for the specific Data Group shall be printed. Please refer to the correlation table, which provides further information on the data that each box must contain.
