

Phase 1 – Getting started

Step 1 - Application

DMS Import

Onboarding mini guide for System-to-System users

Getting started

Application

This first phase and the other phases in the folder "Quick guide Software vendors and In-house developers" are for you, if you are to develop solution for DMS Import.

Phase 1 of the technical onboarding for DMS Import focuses on the available onboarding documents and the application form. To provide you with the best guidance, you can navigate to the specific phase of the onboarding process you are in and follow the steps and associated guides within each phase.

If you already are using H7 in production and already have connectivity for TFE/UFE, you can jump directly to Phase 3.

If you do not already use H7, then you must fill in the application form (Link below). For all testing in TFE you must go through the steps in phase 2.

We encourage you to have a close dialogue with your customers through this process if you are a software vendor. You should use the phases to indicate your progress and readiness for DMS Import go live.

Step 1: Fill in [Application form](#)
