

DMS Transit XML Guide

Version 1.5

Version control		
Version	Date	Change
1.0	21-03-23	Initial version
1.1	23-03-23	Mandatory/Optional/Conditionally Mandatory fields updated for all elements
1.2	31-03-2023	XSD-Path updated, Rules/Codes updated. Added HouseConsignment & ConsignmentItem overview
1.3	25-04-2023	LRN description updated,
1.4	03-05-2023	Added text in “Aim of this Document” to explain the codelist and rulecodelist, as well as reference to the excel sheets.
1.5	21-06-2023	messageRecipient updated to reflect the correct rules. EU Emergency changes

The aim of this document

1

The aim of this document is to give an in-depth description of the different fields and data elements contained in the XSD-files for Transit declarations based on the EU Customs Data Model - <https://eucdm.softdev.eu.com/>

The document is structured after the EUCDM grouping of the data elements as well as DMS-specific data fields that are required by the system when using the S2S solution:

- **System-specific fields:** This section includes fields that are needed by the system to recognize what declaration is sent in, who is submitting the declaration, as well other data that is needed to fulfill the desired action.
- **Group 11:** This section contains basic information about the declaration, meaning if the declaration is pre-lodged or a standard and which procedures the declaration should be processed under. All this information influences how the declaration is processed, what kind of business scenario and procedure to be expected and requested.
- **Group 12:** This section is for the submitter to present all other relevant information and documents related to the submitted declaration that is not contained in the data fields. This is especially used for references tracking documents, authorizations and supplying tracking numbers.
- **Group 13:** This section contains information on all parties involved in the Exit procedure. It is here information on the importer, exporter, declarant, fiscal reference, representative, etc., is provided either by ID or other identifiable information depending on whether the party is a company or private person.
- **Group 14:** In this section valuation information is given, examples of valuations are: taxes, transportation costs, delivery terms, etc.
- **Group 16:** This section contains the location-related information, e.g., where the goods will be or are presented (depending on whether it is a pre-lodged or a standard declaration) as well as the countries involved in the exit process.
- **Group 17:** This section contains information regarding which customs offices have handled the goods in the Transit process.
- **Group 18:** In this section the submitter supplies more detailed information on the goods item(s) such as a weight, description, Taric code(s), etc.
- **Group 19:** This section contains information about the form of transport of goods, e.g., modes, container information, equipment, etc.
- **Group 99:** This section contains other information in the declarations which does not fit into the other above-mentioned groups.

Under each data element in the groups is provided a detailed description on whether the field is mandatory or optional as well as what rules to adhere to depending on the desired business scenario to make use of, and XML-examples are provided to give context.

Information on the EUCDM ID6 reference code is provided to help the reader in seeking further information if needed.

Additionally, under some of the data element you will seeodelist or rulecode codes identifying codes and rules for this element. These elements are relevant under the transitional period of the new system, and you can identify them in the Codelists.xlsx or Rulecodelist.xlsx sheets found on [GitHub](#). The first document can be used to identify the CLxxx errors, and the second document can be used to identify the rest. If there is an error not presented in comments of the data elements, or you can not find it in the code-/rulecodelist sheets, please contact us on Toolkit for further assistance on the subject.

Glossary

2

To make the document shorter and easier to read, some abbreviations are used. Here is a list of the abbreviations used in this document.

Abbreviation	Description	Details
M	Mandatory	The field is mandatory to declare.
O	Optional	The field is optional to declare or should only be declared if relevant information is available.
MC	Conditionally mandatory	The information is mandatory dependent on other information given in the declaration, e.g., type of declaration or commodity code.
DL	Declaration level	The information is given on header level and applies to all the goods items in the declaration.
GSL	Goods shipment level	The information is given on goods shipment level and applies to all the goods items in the goods shipment.
GIL	Goods item level	The information is given on goods item level and applies to only the goods item it is declared under.
C/A	Defines whether an element can be corrected or amended	Yes/Yes means can be corrected and amended. Yes/No means it can be corrected but not amended No/Yes means it can't be corrected but it can be amended No/No means it can't be corrected or amended
EUCDM	European Union Customs Data Model	The European Union Customs Data Model (EUCDM) is the model for Customs trans-European systems such as NCTS, AES, ICS, EOS and for Member States national customs clearance systems
XSD	XML Schema Definition	A document that specifies how to formally describe the elements in an Extensible Markup Language (XML) document. This description can be used to verify that each item of content in a document adheres to the description of the element in which the content is to be placed.
XML	Extensible Markup Language	A simple text-based format for representing structured information, storing, and sending data. It is the file format used to send declarations to DMS.
n/a	Not Applicable	The information does not apply to the given element/declaration.
Requirement Overview	Mandatory / Optional / Conditionally mandatory / Levels / Rules	Defines whether an element is M, O, MC (see abbreviations above) or whether any EUCDM rules apply to the given element in a specific declaration.
M/O	Defines whether a field is mandatory or optional when the main field is in the XML Mandatory/Optional	For a lot of input fields, the sub elements of that field are not always mandatory even though the overall input field is. For example, is Supporting Document which is optional, but when put into to an XML, SequenceNumeric and ID becomes mandatory as the only elements.
ND	Not Determined	The mandatory or optional status of these elements are not yet determined.

Footnotes

3

Throughout the XML-Guide you will see several footnotes, all of these refers to this table. All these footnotes can also be found on EUCDM.

FOOTNOTE	DESCRIPTION
[7]	The Holder of the transit procedure Identification number is mandatory only in the cases where the EORI number or a third country unique identification number recognized by the Union of the person concerned is not provided. Where the EORI number or a third country unique identification number recognized by the Union is provided, the name and address shall not be provided. The TIR Holder identification number is mandatory in case the Declaration type is TIR; otherwise, it cannot be used.
[6]	Where the EORI number or a third country unique identification number recognized by the Union is provided, the name and address shall not be provided.
[8]	This information shall only be provided where available.
[27]	This data element is not mandatory in case the declaration type is TIR.
[30]	Member States may waive this requirement for modes of transport other than rail in case the transit movement doesn't cross the external border of the Union.
[34]	Not for use in the case of postal consignments or carriage by fixed transport installations.
[35]	Where goods are carried in multimodal transport units, such as containers, swap bodies and semi-trailers, the customs authorities may authorize the holder of the transit procedure not to provide this information where the logistical pattern at the point of departure may prevent the identity and nationality of the means of transport from being provided at the time the goods are released for transit, providing multimodal transport units bear unique numbers and such numbers are indicated in D.E. 19 07 063 000 Container identification number.
[36]	In the following cases, Member States shall waive the obligation to enter this information on a transit declaration lodged at the office of departure in relation with the means of transport on which the goods are directly loaded: - where the logistical pattern does not allow this data element to be provided and the holder of the transit procedure has the AEOC status and - where the relevant information may be traced where needed by the customs authorities via the records of the holder of the transit procedure.
[42]	This data element shall only be used in the context of TIR Carnet.
[60]	This data element is to be provided when an authorization exists according to the relevant section of Annex A to this Regulation, Title I Chapter 1.
[61]	This data element is optional when the declaration is submitted prior to presentation of goods.
[70]	Not for use in the case there is no Customs office of transit (17 04 000 000) declared.
[71]	This information shall not be provided if it is the same as the Departure transport means (19 05 000 000).

System specific fields

4

messageType					
C/A	Requirement Overview			XSD-path	
	D1	D2	D4		
No/No	M	M	M	Basepath: Header/ messageType	
EUCDM 6.1	XSD/XML-name			Format	M/O
None	messageType			an6	M
				No official format, no message contains more than 6 alphanumerical characters. CL060	
Description:					
This data element is used to describe which type of special message is being sent					
Rules/codes/other relevant information:					
For the special messages presented in this XML Guide, you can use either one of the following message types:					
<ul style="list-style-type: none"> - CC013C: Amendment - CC014C: Invalidation - CC015C: Transit Declaration - CC007C: Arrival Notification - CC044C: Unloading Remarks - CC141C: Information on non-arrived movement - CC170C: Presentation Notification for the pre-lodged declaration. 					
XML-examples:					
<messageType>CC015C</messageType> -- for transit declarations					

messageRecipient						
C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	M	M	M	Basepath: Header/messageRecipient		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	messageRecipient			An...35	M	
Description:						
This data element is used to show the message recipient						
Rules/codes/other relevant information:						
For transit this field always needs to be NTA.DK the DK here is the country code.						
XML-examples:						
<messageRecipient>NTA.DK</messageRecipient>						

messageSender						
C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	M	M	M	Basepath: Header/messageSender		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	messageSender			An...35	M	
Description:						
This data element is used to show the message sender						
Rules/codes/other relevant information:						
No immediate rules. For restrictions on this element, look at the htypes.xsd and XMLSchema.xsd files						
XML-examples:						
<messageSender>HENRY</messageSender>						

MessageIdentification						
C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	M	M	M	Basepath: Header/messageIdentification		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	messageIdentification			An...35	M	
Description:						
This data element is used to show the message identification.						
Rules/codes/other relevant information:						
No immediate rules. For restrictions on this element, look at the htypes.xsd and XMLSchema.xsd files						
XML-examples:						
<messageIdentification>3MZ608UX4XX643</messageIdentification >						

PreparationDateAndTime						
C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	M	M	M	Basepath: Header/PreparationDateAndTime		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	preparationDateAndTime			an19	M	G0002
Description:						
This data element is used to show the messages preparation date and time content.						
Rules/codes/other relevant information:						
Rules on this element uses a simple RegEx restriction “\d{4}-\d{2}-\d{2}T\d{2}:\d{2}:\d{2}”. It translates to “Year-Month-DayTHour:Minute:Second”. For example: “2022-12-28T15:28:09”						
For more information, look at the htipes.xsd and XMLSchema.xsd.						
XML-examples:						
<PreparationDateAndTime>2022-12-28T15:28:09</PreparationDateAndTime>						

Correlation Identifier						
C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	MC	MC	0	Basepath: Header/correlationIdentifier		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	correlationIdentifier			An...35	MC	B1833, C0511, R0008
Description:						
If multiple notifications are received on the same declaration, this would be the same identifier.						
Rules/codes/other relevant information:						
This shall be equal to the rejected / requested message.						
XML-examples:						
<correlationIdentifier>22DKRQSFJGGNIY8VD1</correlationIdentifier>						

Communication Language at Departure						
C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	0	0	0	Basepath: Header/ communicationLanguageAtDeparture		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	communicationLanguageAtDeparture			A2	0	CL192, R0100
Description:						
This field are used to define what language the declaration is written in.						
Rules/codes/other relevant information:						
This field is to be entered in GENOM country code.						
For Codelist information, see codelist excel sheet found on GitHub						
XML-examples:						
<communicationLanguageAtDeparture>BE</communicationLanguageAtDeparture>						

Limit Date						
C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	MC	MC	0	Basepath: Header/limitDate		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	limitDate			an10	MC	C0839, G0002
Description:						
This is used for the time limit in which the goods shall be presented at the office of destination.						
Rules/codes/other relevant information:						
If not declared manually, it can be set through manual release by the case officer.						
XML-examples:						
<LimitDate>2023-03-03</LimitDate>						

MRN

C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	MC DL	MC DL	MC DL	Basepath: Header/ID		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	ID			an..18	MC	
Description:						
The MRN is automatically generated following the EUCDM legislation as a unique combination of 18 characters. The MRN is created by the Customs agency and is sent as part of the validation acceptance.						
Rules/codes/other relevant information:						
This element is only used in the additional messages: correction, amendment, invalidation, goods presentation, and supplementary declarations.						
The combination of the 18 characters is, in the time of writing, as follows:						
<div><div>- The last two digits of the year of formal acceptance of the declaration (e.g., '23' for 2023)</div><div>- Consist of 2 digits</div><div>- 2. Country where the declaration/proof of the customs status of union goods/notification is lodged (e.g., 'DK' for Denmark)</div><div>- Consist of 2 letters</div><div>- 3. Unique identifier based on year and country (e.g., 21DK04K21L01)</div><div>- Consist of 12 alphanumeric characters</div><div>- 4. Procedure identifier (see tables below)</div><div>- Consist of 1 letter</div><div>- 5. Check digit (e.g., '6')</div><div>- Consist of 1 alphanumeric character</div></div>						
Code	Procedures			Declarations		
A	Export only			B1, B2, B3, or C1		
B	Export and exit summary declaration			Combinations of A1 or A2, with B1, B2, B3, or C1		
C	Exit summary declaration only			A1 or A2		
D	Re-export notification			A3		
E	Dispatch of goods in relation with special fiscal territories			B4		
Code	Procedures			Declarations		
J	Transit declaration only			Columns D1 (Special procedure — Transit declaration) D2 (Special procedure –Transit declaration with reduced dataset – (transport by rail, air and maritime transport)) possibly complemented by D4		
K	Transit declaration and exit summary declaration			Combinations of columns D1 or D2 with (A1 (Exit summary declaration) A2 (Exit summary declaration — Express consignments)) possibly complemented by D4.		
L	Transit declaration and entry summary declaration			Combinations of columns D1 or D2 with Entry summary declaration data; possibly complemented by D4.		

M	Transit declaration and exit summary declaration and entry summary declaration	Combinations of columns (D1 or D2) with (A1 or A2) and Entry summary declaration; possibly complemented by D4.
XML-examples:		
<ns3:ID>22DKRQSFJGGNIY8VA1</ns3:ID>		

Invalidation

C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	N/A	N/A	N/A	Basepath: Header/ Invalidation		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	requestDateAndTime			an19	MC	C0129, G0002
None	decisionDateAndTime			an19	MC	C0870, G0002
None	Decision			n1	MC	CL027, C0128, R0102
None	initiatedByCustoms			n1	M	CL027, G0101
None	justification			an..512	MC	C0137
Description:						
This element is only mandatory for invalidations requests. Is used to specify the reason for invalidations.						
Rules/codes/other relevant information:						
requestDateAndTime: This needs to be filled when submitting the invalidation.						
decisionDateAndTime: This is never to be filled by the trader.						
Decision: This is never to be filled by the trader.						
initiatedByCustoms: This field always needs to be "0" when filled by trader.						
justification: The reasoning to why the cancellation has happened.						
XML-examples:						
<pre><Invalidation> <requestDateAndTime>2023-03-16T14:27:21</requestDateAndTime> <initiatedByCustoms>0</initiatedByCustoms> <justification>I just wanted to invalidate something</justification> </Invalidation></pre>						

Group 11 – Message information (including procedure codes)

5

Declaration type/Additional declaration type

C/A	Requirement Overview			XSD-path		
	D1	D2	D4			
No/No	M	M	N/A	Basepath: Header/TransitOperation/ DeclarationType Header/TransitOperation/ AdditionalDeclarationType Header/Consignment/HouseConsignment/ConsignmentItem/ Declarationtype		
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
11 01 001 000	Declaration type			An..5	M	CL231 CL232, C0045 R0507 B1922, R0601, R0909, R0911
11 02 001 000	Additional declaration type			a1	M	CL042
Description:						
Indicates what type of action is intended: submission of a pre-lodged/standard, a correction/amendment request or an invalidation/invalidation and repayment request.						
Rules/codes/other relevant information:						
Declaration Type (11 01 001 000) and Additional Declaration Type (11 02 001 000) data elements in Transit are two separate data elements.						
For Codelist information, see codelist excel sheet found on GitHub						
The two common Declaration Types (11 01 001 000) are T1 and T2 for Transit, as seen on the link below. For a standard declaration, you can input 'A' into the Additional Declaration Type data element.						
You can read about the data elements here: https://eucdm.softdev.eu.com/Archive/EUCDM%206.1/EN/EUCDM/Annex-B/e21.htm						
For additional messages:						
The codes to declare in this field for additional messages:						
<div><div></div><div><div></div><div></div><div></div></div></div> <div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div></div> Description:						
Information about the place where the goods are located						
Rules/codes/other relevant information:						
GoodsLocation (16 15 000 000):						
This data element can be supplemented on a supplementary declaration for D1 declarations.						
The type of location, and how it is declared, is given by the fields: TypeCode and IdentificationType. For declaring the location of goods there are predefined codes for indicating the type of location and how it is declared with specific possible values and combinations:						
CountryCode (16 15 018 020):						
The countryCodes can be found here https://skat.dk/data.aspx?oid=1815411						

TypeCode (16 15 045 000)

The type of location, and how it is declared, is given by the fields: TypeCode and IdentificationType. For declaring the location of goods there are predefined codes for indicating the type of location and how it is declared with specific possible values and combinations:

This TypeCode Indicates the type of location where the goods will be presented.

For Codelist information, see codelist excel sheet under **CL347** found on [Github](#).

IdentificationType (16 15 046 000):

Indicates how the location will be declared)

The Address/TypeCode will indicate how the location will be declared.

For Codelist information, see codelist excel sheet under **CL326** found on [Github](#).

The valid combinations for the two fields are:

- 'A' and 'U': Designated place identified by UN/LOCODE (e.g., DKCPH-0011 for Copenhagen - Langelinje)
- 'A' and 'V': Designated place identified by Customs Office ID (e.g., DK007900 for Skattecenter København)
- 'B' and 'Y': Authorised place identified by Authorisation number. - NOT possible to use yet
- 'C' and 'Z': Approved place identified by filling in the address fields.
- 'D' and 'Z': Other place identified by filling in the address fields.
- 'D' and 'W': Other place identified by GNSS coordinates. – currently unavailable
- 'D' and 'X': Other place identified by an EORI number. – currently unavailable

Reference Number (16 15 047 001):

For Codelist information, see codelist excel sheet under **CL171** found on [Github](#).

Name (16 15 036 000)

For Codelist information, see codelist excel sheet under **CL244** found on [Github](#).

ID (16 15 053 000):

What to fill in this field is given by the Type of location, meaning that if:

- IdentificationType = 'U': this field should not be filled.
- IdentificationType = 'V': this field should not be filled.
- IdentificationType = 'W': this field should not be filled. – currently unavailable
- IdentificationType = 'X': this field can be filled with an additional identifier. – currently unavailable
- IdentificationType = 'Z' this field should not be filled.

The following subelements of **Address (16 15 018 00)** should only be filled when IdentificationType = 'Z':

CityName (16 15 018 022):

City name of the location of goods.

CountryCode (16 15 018 020):

For Codelist information, see codelist excel sheet under **CL009** found on [Github](#).

Line (16 15 019 00):

Street name and street number of the location of goods.

PostCodeID (16 15 018 020):

Post code of the location of goods.

authorisationReferenceNumber:

Should only be filled when IdentificationType = 'Y'.

CustomsOffice:**identification:**

Customs Office ID (e.g., DK007900).

Should only be filled when IdentificationType = 'V'.

See the list of Customs Office ID's here: https://ec.europa.eu/taxation_customs/dds2/rd/rd_search_home.jsp?Lang=en

latitude:

Latitude coordinates of the location of goods.

Should only be filled when IdentificationType = 'W'. – currently unavailable

longitude:

Longitude coordinates of the location of goods.

Should only be filled when IdentificationType = 'W'. – currently unavailable

EconomicOperator:**identification:**

EORI number of Economic Operator.

Should only be filled when IdentificationType = 'X'. – currently unavailable

XML-examples:

```
<GoodsLocation>
  <identification_2>
