

# Phase 2 – Getting started

Introduction

# DMS Import

Onboarding mini guide for System-to-System users

# Introduction – Phase 2

## Getting connected System-to-System

Now you have been approved to start onboarding and received the welcome e-mail from the technical onboarding team. If not – go to [Phase 1](#).

Phase 2 includes onboarding documents to help you connect to the development (UFE) and test environment (TFE). For you to gain access to UFE and TFE, the technical onboarding team first need to assign roles and rights to your desired system certificate. You can use the same certificate for DMS Import, as you use for DMS Export and Transit.

If this is your first time connecting to DMS, then please wait with Phase 2, step 2 until the technical onboarding team has confirmed that you may proceed.

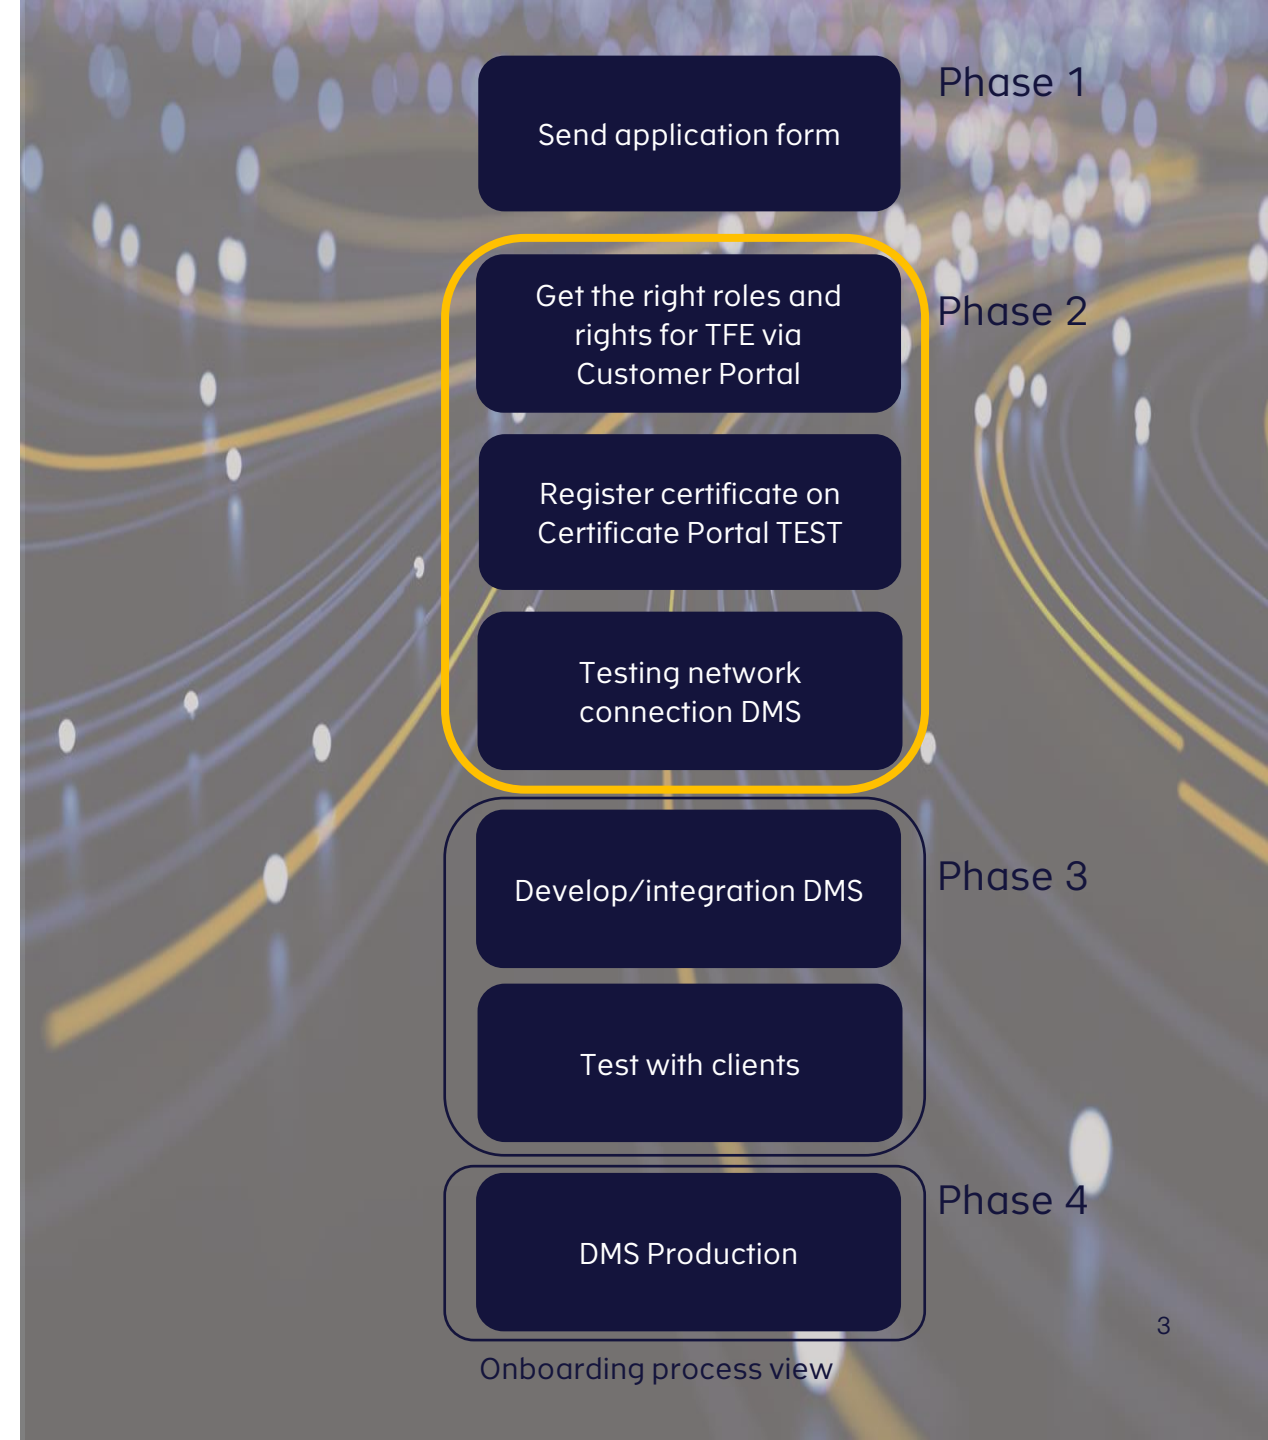

If you are reusing your certificate, then you may skip Phase 2, step 2.

Phase 2 covers:

**Step 1: Get the right roles and right for TastSelv Erhverv test through Customer Portal**

**Step 2: Register certificate on the certificate portal AS4 – test**

**Step 3: Test Network connection for DMS**
