README

# DMS Import

Onboarding mini guide for System-to-System users

# README – Phase 3

## Develop and test System-to-System

At this point, you have obtained the appropriate roles and permissions in TastSelv Erhverv Test through the Customer Portal. You have registered the certificate on the Certificate Portal for AS4 TFE and tested the network connection via the AS4 Gateway to DMS.

In Phase 3, it is time to develop and integrate with DMS. This README contains a collection of links to the relevant files you will need for this process.

We also recommend testing the integration with your client to ensure they are ready to use DMS Import as soon as it goes live.
