

Phase 1 – Getting started

Step 1 - Application

DMS Import

Onboarding mini guide for System-to-System users

Getting started

Application

This introduction phase and the other phases in the folder "Quick guide Economic Operators" are for you, if you are using a solution from a Software vendor.

Phase 1 of the technical onboarding for DMS Import focuses on the available onboarding documents and the application form. To provide you with the best guidance, you can now navigate to the specific phase of the onboarding process you are in and follow the steps and associated guides within each phase.

If you already are using H7 in production, already have connectivity for TFE or do not have intentions to test declaration flows in TFE, you can jump directly to Phase 3 – step 2.

If you do not already use H7, then you must fill in the application form (Link below). For all testing in TFE you must go through the steps in phase 2.

As an Economic Operator using a solution provided by a software vendor, we encourage you to have a close dialogue with your software vendor and both use the phases to indicate your progress and readiness for DMS Import go live.

Step 1: Fill in [Application form](#)
