DMS Export XML Guide

Version 1.27

	Version cont	trol
Version	Date	Change
1.0	21-10-2022	Initial version.
1.1	25-10-2022	Generally updated.
1.4	15-11-2022	Updated for B2 and B4, changed XSD pathing and optional/man-
		datory check through.
1.5	20-12-2022	Minor corrections.
1.6	21-03-2023	B3 adjusted, SAD Boxes removed, and ND has been updated.
1.7	31-03-2023	Combined Declarations, Codelist references updated.
1.8	14-04-2023	Updated codelist references which referencing excel sheet, LRN
		update, further details regarding some header elements, require-
		ments updated.
1.9	25-04-2023	Updated LRN descriptions, grammatical errors, element additions.
1.10	03-05-2023	Updated optionality on TradeTerms. Added text in "Aim of this
		Document" to explain the codelist and rulecodelist, as well as ref-
	00.06.0000	erence to the excel sheets.
1.11	02-06-2023	Updated the DutyTaxFee element, added missing footnote, Decla-
4.40	24.06.2022	rationOfficeID added, DateOfAcceptance updated.
1.12	21-06-2023	EU Emergency changes implemented
1.13	04-08-2023	Full review process, confirming elements, optionality, reference
1.14	18-08-2023	numbers and element names to better match DDNXA Q2 and XSDs. Removed references to CL141, added Customs Office Information
1.14	10-00-2023	link.
1.15	01-09-2023	Added comments to differentiate between C1 Standard and C1
1.13	01-07-2023	Supplementary as well as between C2 GPR and C2 EIDR.
1.16	07-09-2023	Added footnote [38] from EUCDM
	0.012020	Mode of transport at the border: changed the XML Example from
		TypeCode field to ID
		Changed the XML Example from TypeCode field to ID field.
1.17	15-09-2023	Corrected discrepancies in 'Location of Goods' and made some ele-
		ments more explicit. Corrected 'Country of Origin' and 'Total In-
		voice Amount' elements. DKSEN not used.
		Removed Inland mode of transport. Corrected the requirement
		overview of Active Border Transport Means.
		Fixed country formats. Corrected TransportEquipment. Corrected
		representative agent information.
1.18	19-10-2023	Reduced confusion about C2 GPR function. Commodity codes up-
1.10	00.44.0000	dated with correct examples and requirements.
1.19	03-11-2023	Updated Location of Goods.
1.20	19-12-2023	Updated additional information field to reflect updates.
1.21	02-02-2024	Updated Inland Mode of Transport, Representative/Agent, Authorisation, and Submitter.
1.22	20-02-2024	Replaced deprecated skat links with codelist references. Moved
1.22	20-02-2024	Mode of Transport at the Border and Updated
		Active Border Transport Means, and AdmissionUseProcessingAu-
		thorisation
1.23	29-02-2024	Specified admissible characters in Description of goods on page
		83
1.24	19-04-2024	Updated combined nomenclature code
1.25	13-05-2024	Updated CountryCode, Consignee/ID, NetNetWeightMeasure,
		QuantityQuantity, and LineNumeric with EU formatting re-
		strictions. Updated Location of Goods.
1.26	15-05-2024	Updated PreviousDocument/QuantityQuantity, and TraderAs-
		signedReferenceID with EU formatting restrictions.

1.27	10-07-2024	Elaborated on valid input for Commodity/Classification/ID for
		Harmonized System Sub-heading and Combined Nomenclature
		codes.

The aim of this document

The aim of this document is to give an in-depth description of the different fields and data elements contained in the XSD-files for export based on the <u>European Union Customs Data Model (EUCDM) version 6.1.</u>

The document is structured after the EUCDM grouping of the data elements as well as DMS-specific data fields that are required by the system when using the S2S solution:

- **System-specific fields**: This section includes fields that are needed by the system to recognize what declaration is sent in, who is submitting the declaration, as well other data that is needed to fulfill the desired action.
- Group 11: This section contains basic information about the declaration, meaning if the declaration is prelodged or a standard and which procedures the declaration should be processed under. All this information influences how the declaration is processed, what kind of business scenario and procedure to be expected and requested.
- **Group 12**: This section is for the submitter to present all other relevant information and documents related to the submitted declaration that is not contained in the data fields. This is especially used for references tracking documents, authorizations and supplying tracking numbers.
- **Group 13**: This section contains information on all parties involved in the export. It is here information on the importer, exporter, declarant, fiscal reference, representative, etc., is provided either by ID or other identifiable information depending on whether the party is a company or private person.
- **Group 14**: In this section valuation information is given, examples of valuations are: taxes, transportation costs, delivery terms, etc.
- **Group 16**: This section contains the location-related information, e.g., where the goods will be or are presented (depending on whether it is a pre-lodged or a standard declaration) as well as the countries involved in the export process.
- **Group 17**: This section contains information regarding which customs offices have handled the goods in the export process.
- **Group 18**: In this section the submitter supplies more detailed information on the goods item(s) such as a weight, description, Taric code(s), etc.
- **Group 19**: This section contains information about the form of transport of goods, e.g., modes, container information, equipment, etc.
- **Group 99**: This section contains other information in the declarations which does not fit into the other above-mentioned groups.

Under each data element in the groups is provided a detailed description on whether the field is mandatory or optional as well as what rules to adhere to depending on the desired business scenario to make use of, and XML-examples are provided to give context.

Information on the EUCDM ID6 reference code is provided to help the reader in seeking further information if needed.

Additionally, under some of the data element you will see codelist or rulecode codes identifying codes and rules for this element. These elements are relevant under the transitional period of the new system, and you can identify them in the Codelists.xslx or Rulecodelist.xlsx sheets found on <u>GitHub</u>. The first document can be used to identify the CLxxx errors, and the second document can be used to identify the rest. If there is an error not presented in comments of the data elements, or you can not find it in the code-/rulecodelist sheets, please contact us on Toolkit for further assistance on the subject.

Glossary

To make the document shorter and easier to read, some abbreviations are used. Here is a list of the abbreviations used in this document.

Abbreviation	Description	Details
M	Mandatory	The field is mandatory to declare.
0	Optional	The field is optional to declare or should only be declared if rele-
		vant information is available.
MC	Conditionally mandatory	The information is mandatory dependent on other information
		given in the declaration, e.g., type of declaration or commodity
		code.
DL	Declaration level	The information is given on header level and applies to all the
		goods items in the declaration.
GSL	Goods shipment level	The information is given on goods shipment level and applies to
		all the goods items in the goods shipment.
GIL	Goods item level	The information is given on goods item level and applies to only
		the goods item it is declared under.
C/A	Defines whether an element can	Yes/Yes means can be corrected and amended.
	be corrected or amended	Yes/No means it can be corrected but not amended
		No/Yes means it can't be corrected but it can be amended
		No/No means it can't be corrected or amended
EUCDM	European Union Customs Data	The European Union Customs Data Model (EUCDM) is the model
	Model	for Customs trans-European systems such as NCTS, AES, ICS, EOS
		and for Member States national customs clearance systems
XSD	XML Schema Definition	A document that specifies how to formally describe the elements
		in an Extensible Markup Language (XML) document. This de-
		scription can be used to verify that each item of content in a doc-
		ument adheres to the description of the element in which the
		content is to be placed.
XML	Extensible Markup Language	A simple text-based format for representing structured infor-
		mation, storing, and sending data. It is the file format used to
		send declarations to DMS.
n/a	Not Applicable	The information does not apply to the given element/declaration.
Requirement	Mandatory / Optional / Condition-	Defines whether an element is M, O, MC (see abbreviations
Overview	ally mandatory / Levels / Rules	above) or whether any EUCDM rules apply to the given element
		in a specific declaration.
M/O	Defines whether a field is manda-	For a lot of input fields, the sub elements of that field are not al-
	tory or optional when the main	ways mandatory even though the overall input field is.
	field is in the XML Mandatory/Op-	
	tional	For example, is Supporting Document which is optional, but
		when put into to an XML, SequenceNumeric and ID becomes
		mandatory as the only elements.
ND	Not Determined	The mandatory or optional status of these elements are not yet
		determined.

Footnotes

Throughout the XML-Guide you will see several footnotes, all of these refers to this table. All these footnotes can also be found on EUCDM.

FOOTNOTE	DESCRIPTION
[1]	This information shall not be required in case a customs declaration has been lodged prior to the
	presentation of the goods pursuant to Article 171 of the Code.
[2]	In the cases where Article 166(2) of the Code (simplified declarations based on authorisations) is applicable, Member States may waive the obligation to provide this information where the conditions prescribed in the authorisations associated with the procedures concerned allow them to defer the collection of this data element in the supplementary declaration.
[4]	This information needs to be provided only where Article 166(2) of the Code (simplified declarations based on authorisations) is applicable; in this case, it is the number of the authorisation for simplified procedure. However, this data element can also contain the transport document number concerned.
[5]	This information is only required where the declaration of placing of goods under a customs procedure is used to discharge a customs warehousing procedure.
[6]	Where the EORI number or a third country unique identification number recognised by the Union is provided, the name and address shall not be provided.
[8]	This information shall only be provided where available.
[10]	Member States may waive this information where the customs value of the goods in question cannot be determined under the provisions of Article 70 of the Code. In such cases the declarant shall furnish or cause to be furnished to the customs authorities such other information as may be requested for the purposes of determining the customs value.
[11]	This information is not to be provided when customs administrations calculate duties on behalf of economic operators on the basis of information elsewhere in the declaration. It is otherwise optional for the Member States.
[15]	Member States may require this information only in cases when the rate of exchange is fixed in advance by a contract between the parties concerned.
[17]	This information shall only be required where the simplified declaration is not lodged together with an exit summary declaration.
[18]	This data element is mandatory for agricultural products with export refunds.
[19]	This data element is mandatory for agricultural products subject to refunds and for those goods which Union legislation requires the origin of the goods in the context of trade with special fiscal territories.
[22]	This information shall only be used in case of centralised clearance.
[23]	This information shall only be used in case the declaration for temporary storage or the customs declaration to place the goods under a special procedure other than transit is lodged at a customs office different to the supervising customs office as indicated in the respective authorisation.
[24]	This information shall only be required in case of commercial transactions involving at least two Member States.
[31]	This information does not have to be provided when export formalities are carried out at the point of exit from the customs territory of the Union.
[33]	This data element is mandatory for agricultural products with export refunds, unless they are carried by post or fixed transport installations. [In case of transport by post or fixed installations, this information shall not be required.]
[34]	Not for use in the case of postal consignments or carriage by fixed transport installations.
[38]	This data element is mandatory for agricultural products with export refunds unless they are carried by post, fixed transport installations, or rail. [In case of transport by post, fixed installations or rail, this information shall not be required.]
[40]	The Member State of acceptance of the declaration may waive the obligation to provide this information where it is in the position to assess it correctly and has implemented calculation routines to provide a result compatible with statistical requirements.
[41]	This data element shall only be used in the context of a supplementary declaration for Entry into the declarant's records.
[60]	This data element is to be provided when an authorisation exists according to the relevant section of Annex A to this Regulation, Title I Chapter 1.
[62]	This information shall relate to the situation at the moment when the declaration is made.
[63]	This information shall be provided for decisions relating to binding information.
[67]	This information shall be required when Region of dispatch is provided.

System specific fields

Function Code

CIA		Requi	ireme	nt Ove	rview		VCD				
C/A	B1	B2	В3	B4	C1	C2	XSD-path				
No /No	M	M	M	M	M	M

EUCDM 6.1	XSD/	XML-r	ame				Format	M/0	Comment		
None	Funct	ionCo	de				n2	M			

Description:

This data element is the code which indicates the type of request being sent, whether it be a submission, amendment, correction, etc. There are predefined codes for each request.

Rules/codes/other relevant information:

It is possible to use these codes:

- 1: Cancellation/Invalidation request to an already existing declaration
- 4: Correction/Amendment request to an already existing declaration
- 9: Initial submission of a declaration
- 24: Goods presentation of goods items request (C2 message) to an already existing declaration
- 34: Supplementary declaration for simplified declaration (C1)

XML-examples:

```
<ns3:FunctionCode>9</ns3:FunctionCode>
or
<ns3:FunctionCode>4</ns3:FunctionCode>
or
<ns3:FunctionCode>1</ns3:FunctionCode>
or
<ns3:FunctionCode>24</ns3:FunctionCode>
or
<ns3:FunctionCode>24</ns3:FunctionCode>
or
<ns3:FunctionCode>34</ns3:FunctionCode>
--- for goods presentation
or
<ns3:FunctionCode>34</ns3:FunctionCode>
--- for a supplementary declaration
```

Procedure Category

EUCDM 6.1	XSD/	XML-r	ame				Format	M/O	Comment		
None	Proce	dureC	ategor	y	•		an3	M			

Description:

This data element indicates what type of declaration is being submitted

Rules/codes/other relevant information:

ProcedureCategory needs to be declared as the declaration type that is submitted, e.g., 'B1' for submitting a B1 declaration.

For declarations:

The data in ProcedureCategory needs to be the type of declaration that is submitted.

For additional messages:

The data in ProcedureCategory needs to be the type of declaration the additional message is submitted to.

It is possible to use these codes:

- B1: Export & Re-export Declaration
- B2: Special procedure Processing Declaration for outward processing
- B3: Declaration for Customs Warehousing of Union Goods
- B4: Declaration for Dispatch of Goods to Special Fiscal Territories
- C1: Simplified & Supplementary Declaration
- C2: Presentation Notification
- C2EIDR: Entry into declarant's records

XML-examples:

<ns3:ProcedureCategory>B1</ns3:ProcedureCategory>

or

<ns3:ProcedureCategory>C1</ns3:ProcedureCategory>

or

<ns3:ProcedureCategory>C2</ns3:ProcedureCategory>

DeclarationOfficeID

CIA		Requi	ireme	nt Ove	rview		VCD			
C/A	B1	B2	В3	B4	C1	C2	XSD-path

EUCDM 6.1	XSD/	XML-r	name				Format	M/O	Comment	
None	Decla	ration	OfficeI	D			an8	M		

Description:

This element is used to define the Office of Lodgement

Rules/codes/other relevant information:

This element, as mentioned in the description, is the Office of Lodgement. This means that the DeclarationOfficeID input typically matches either the Office of Export or the Office of Exit, depending on which office the declaration is lodged from.

XML-examples:

<ns3:DeclarationOfficeID>DK005600/ns3:DeclarationOfficeID>

MRN

Requirement Overview							VCD	VCD moth			
C/A	B1	B2	В3	B4	C1	C2	XSD-path				
No /No	MC	MC	MC	MC	MC	MC	Description /ID				
NO/NO	No/No DL DL		DL	DL	DL	DL	Basepath: Declaration/ID				
EUCDM 6.1	EUCDM 6.1 XSD/XML-name								Comment		
None	ID						an18	MC	G0002 R0028		

Description:

The MRN is automatically generated following the EUCDM legislation as a unique combination of 18 characters. The MRN is created by the Customs agency and is sent as part of the validation acceptance.

Rules/codes/other relevant information:

This element is only used in the additional messages: correction, amendment, invalidation, goods presentation, and supplementary declarations.

The combination of the 18 characters is, in the time of writing, as follows:

- The last two digits of the year of formal acceptance of the declaration (e.g., '23' for 2023)
 - Consist of 2 digits
- 2. Country where the declaration/proof of the customs status of union goods/notification is lodged (e.g., 'DK' for Denmark)
 - Consist of 2 letters
- $\ \ 3. \ Unique \ identifier \ e.g., \ XF5LOFP4P7C4$
 - Consist of 12 alphanumeric characters
- 4. Procedure identifier (see tables below)
 - Consist of 1 letter
- 5. Check digit (e.g., '6')
 - Consist of 1 alphanumeric character

Code	Procedures	Declarations
A	Export only	B1, B2, B3, or C1
В	Export and exit summary declaration	Combinations of A1 or A2, with B1, B2, B3, or C1
С	Exit summary declaration only	A1 or A2
D	Re-export notification	A3
Е	Dispatch of goods in relation with special fiscal territories	B4

Code	Procedures	Declarations
J	Transit declaration only	Columns D1 (Special procedure Transit declaration)
		D2 (Special procedure –Transit declaration with reduced dataset – (transport by rail, air and maritime transport)) possibly complemented by D4
K	Transit declaration and exit summary declaration	Combinations of columns D1 or D2 with (A1 (Exit summary declaration)
		A2 (Exit summary declaration Express consignments)) possibly complemented by D4.
L	Transit declaration and entry summary declaration	Combinations of columns D1 or D2 with Entry summary declaration data; possibly complemented by D4.

M	Transit declaration and exit summary declaration and entry summary declaration	Combinations of columns (D1 or D2) with (A1 or A2) and Entry summary declaration; possibly complemented by D4.

Description:

Fields used to validate Ship supplies

Rules/codes/other relevant information:

All elements **needs** to be here in order to validate Extensions fields. I.e. you need all 15 extensions to have them validated If a data field is not relevant for the declaration, write in "0" instead of a value, in the value element.

The data element "Value" is the only one you should change. See descriptions of what each Key element means, in the table below

Vehicle driver	VEHC_DRIVER
Vehicle Type	VEHC_TYPE
Home Port	HOME_PORT
Destination of Expedition (Route)	DEST_EXP_R
Duration of expedition	DUR_EXP
Place of loading	PLACE_UNLO
Number of crew	NR_CREW
Liquor - Amount of bottles/liters	LIQ_AMOUNT
Wine - Amount of bottle/liters	WINE_AMOUNT
Cigarettes (units)	CIGARETTE_U
Cigars and Cheroots (units)	CIGAR_U
Tobacco (kilograms)	TOBAC_KG
Beer (bottles/cans)	BEER_AMOUNT
Other supply	OTHER_SUP
Description of desired Victualling	DESC_DES_VIC

Description:

Customs Decision application element 8F for Customs Decision.

Rules/codes/other relevant information:

Although some elements resemble elements from the other parts of a B2 declaration they might not have the same list of valid values e.g. QualifierOfTheIdentification resembles an element from Goods Location, but this application does not contain the value 'T'. There may not exist similar validation rules on these fields, but this application will always trigger a manual task, so the customs officer will perform additional validation when reviewing the application.

Owner of the Goods (GoodsOwner): Where applicable under the relevant Article, enter the name and address of the non-Union owner of the goods to be placed under the temporary admission

First Place of use or processing (FirstPlaceOfUseOrProcessing): Using the relevant code, enter the address of the place concerned. This information shall only be provided, if, in the context of an application for an authorisation for the use of inward processing or end-use procedures.

Place(s) of processing or use (PlaceOfProcessingOrUse): Using the relevant code, indicate the address of the place(s) concerned.

LocationTypeCode: similar to Goods Location; valid values are 'A', 'B', 'C', 'D'. **QualifierOfTheidentification**: similar to Goods Location; values values are 'U', 'V', 'Y', 'Z', 'X', 'W'.

Customs Office(s) of discharge (CustomsOfficesOfDischarge): Indicate the suggested customs office(s)

Supervising customs office (SupervisingCustomsOffice): Indicate the competent customs office, as provided for in article 1(36).

Period for discharge & Bill of discharge (DischargePeriod & BillOfDischarge): Enter the estimated period expressed in months needed for the operations to be carried out or use within the special customs procedure applied for.

Processed Products (ProcessedProducts): Enter details of all processed products resulting from the operations, indicating the main processed product and the secondary processed products which are by-products of the processing operation other than the main processed product, as appropriate.

Identification of Goods (AuthorisationCode): Enter the intended measures of identification by using at least one of the relevant codes

Economic Conditions (EconomicCondition): The inward or outward processing procedure can be used only where the essential interests of the Union producers would not be adversely affected by an authorisation for a processing procedure (economic conditions).

In most of the cases an examination of the economic conditions is not necessary. However, in certain cases such an examination must be carried out at Union level.

Details of Planned Activities (DetailsOfPlannedActivities): Describe the nature of the planned activities or use (e.g., details of the operations under a job-processing contract or kind of usual forms of handling under inward processing) to be carried out on the goods within the special procedure.

If the applicant wishes to carry out the processing of the goods under inward processing or end-use procedure in a customs warehouse, pursuant to Article 241 of the Code, he shall provide the relevant details.

Where appropriate, indicate name, address and function of other persons involved.

Additional Information (AdditionalInformationText): Enter any additional information, if deemed helpful

Calculation of the amount of the import duty in accordance with article 86(3) of the Code (ImportDuty): *Application*:

Indicate ('yes/no') whether the applicant wishes to calculate the import duty in accordance with Article 86(3) of the Code.

If the answer is 'no', Article 85 of the Code must be applied, which means, that the calculation of the amount of import duty is made on the basis of the tariff classification, customs value, quantity, nature and origin of the goods at the time at which the customs debt in respect of them incurred.

Decisions:

In case the holder of the authorisation wishes to calculate the import duty in accordance with Article 86(3) of the Code, the authorisation for inward processing shall provide for that the relevant processed products may not be imported directly or indirectly by the holder of the authorisation and released for free circulation within a period of one year after their re-export. However, the processed products may be imported directly or indirectly by the holder of the authorisation and released for free circulation within a period of one year after their re-export if the amount of import duty is determined in accordance with Article 86(3) of the Code.

None	Chang	geReas	onCod	le			an3	M				
None	Chang	geReas	ontext	:			an512	M	Must be at least 10 characters			

Description:

Only used for and is mandatory for correction, amendment invalidations requests.

Is used to specify the reason for changes or invalidations.

Rules/codes/other relevant information:

Must only be declared when submitting an amendment/correction/invalidation (FunctionCode set to 1 or 4).

There can only be declared one amendment field pr. request. Multiple amendments would require multiple requests.

There are specific codes for indicating the reason for a correction/amendment/invalidation/invalidation and repayment in the ChangeReasonCode:

Correction/amendment:

- '5': Corrected by declarant.
- '6': Addition of missing data element.
- '7': Mistaken customs procedure.
- '8': Special circumstances that do not justify placement.
- '10': Corrected by Customs.
- '11': Corrected quota quantity addition agreed.
- '13': Corrected by DMS.
- '14': Corrected by DMS.

Invalidation

- '22': Goods have been returned to supplier
- '23': Union goods declared by mistake
- '24': Registration of same goods on several declarations
- '25': Postal low value consignments returned on basis of barcode S10
- '26': Accepted declarations with goods to be placed under another customs procedure
- '27': The customs procedure is no longer justified due to special circumstances

In the ChangeReasonText field there should be a short description for the reason of changes/invalidation of at least 10 characters.

XML-examples:

For correction/amendment:

<ns3:Amendment>

<ns3:SequenceNumeric>1</ns3:SequenceNumeric>

<ns3:ChangeReasonCode>5</ns3:ChangeReasonCode>

<ns3:ChangeReasonText>Spelling error in field</ns3:ChangeReasonCode>

</ns3:Amendment>

For invalidation

<ns3:Amendment>

<ns3:SequenceNumeric>1</ns3:SequenceNumeric>

<ns3:ChangeReasonCode>22</ns3:ChangeReasonCode>

<ns3:ChangeReasonText>Goods have been returned to supplier</ns3:ChangeReasonCode>

</ns3:Amendment>

Group 11 – Message information (including procedure codes)

Declaration type/Additional declaration type

Description:

Indicates what type of action is intended: submission of a pre-lodged/standard, a correction/amendment request or an invalidation/invalidation and repayment request.

Rules/codes/other relevant information:

For declarations this data element is a concatenation of **11 01 001 000** – Declaration type and **11 02 001 000** – Additional declaration type. For the additional messages this is considered a system specific field. For Codelist information, see codelist excel sheet found on <u>GitHub</u>. For rulecodelist information, see rulecodelist excel sheet found on <u>GitHub</u>.

For standard declarations:

Example:

For Declaration type 'EX' and Additional Declaration Type 'A', the input for the data element is 'EXA'

For pre-lodged declarations:

Example:

For Declaration type 'EX' and Additional Declaration Type 'D', the input for the data element is 'EXD'

For additional messages:

The codes to declare in this field for additional messages:

- 'COR' for sending a correction or amendment request to an already existing declaration
- 'INV' for sending an invalidation or invalidation and repayment request to an already existing declaration
- 'GPR' for presenting goods to an already existing pre-lodged declaration
- 'SUP' for supplementing a simplified export declaration

For additional explanations, see EUCDM, using the ID6 number as search:

https://eucdm.softdev.eu.com/Archive/EUCDM%206.1/EN/EUCDM/Annex-B/e21.htm

XML-examples:

<ns3:TypeCode>EXA</ns3:TypeCode> --- for submitting an EXA
<ns3:TypeCode>EXD</ns3:TypeCode> --- for submitting an EXD
<ns3:TypeCode>COR</ns3:TypeCode> --- for submitting a correction/amendment request
<ns3:TypeCode>INV</ns3:TypeCode> --- for submitting an invalidation
<ns3:TypeCode>GPR</ns3:TypeCode> --- for presenting goods declared on a pre-lodged declaration
<ns3:TypeCode>SUP</ns3:TypeCode> --- for supplementing a simplified declaration

Description:

Information relating to a previous document.

Rules/codes/other relevant information:

If one subfield is filled, all subfields must be filled.

For relevant codes to fill in **CategoryCode** and **TypeCode**, see <u>Codelists – AES.xlsx</u> under sheet CL214 CategoryCode must be the initial letter, so that CategoryCode + the three numbers of TypeCode = a code defined in CL214

SequenceNumeric:

To refer multiple documents, repeat this element the required number of times and fill here sequentially starting at 1.

TypeCode (12 01 003 000):

For Codelist information, see codelist excel sheet found on **GitHub**

LineNumeric (12 01 007 000):

Enter the sequential number of the item in the supporting document (e.g., certificate, license, permit, entry document etc.), corresponding to the item in question. EU formatting requirement: the number must not start with or be equal to zero.

TypeCode (12 01 002 000):

For Codelist information, see codelist excel sheet found on GitHub

Reference number (12 01 001 000):

Can be found here, https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02015R2447-20210315&qid=1666165195727&from=en on page 314 under "12 01 001 000 Reference Number"

AcceptanceDateTime (15 09 001 000):

This element is mandatory for C2 EIDR and not C2 PN

For AcceptanceDateTime (15 09 001 000) footnote [41] applies to B1, B2, B4 and C2 declarations.

Measurement Unit and Qualifier (12 01 005 000)

For Codelist information, see codelist excel sheet found on GitHub

Quantity Quantity (12 01 004 000):

EU formatting/legal restrictions: the value of this element may not be equal to zero or a number starting with zero which does not have a decimal point.

Description:

Use this data element to include information for which no field is specified by Union legislation.

Rules/codes/other relevant information:

This element can be used to declare an **SE number**, **other guarantee forms**, or other information for which no field is specified.

Optional to declare and can be declared on GoodsShipment level or GoodsItem level or both*.

*During the transition period, you can only declare this element on GoodsItem level (see E1301)

If given on GoodsShipment level (GSL) the information applies to all the goods items in the declaration.

If given on GoodsItem level (GIL) the information applies to only the goods items which it is declared under.

SequenceNumeric:

There can be declared multiple additional documents. Number them sequentially here.

StatementCode (12 02 008 000):

For Codelist information, see codelist excel sheet found on GitHub

StatementDescription (12 02 009 000):

A short description of the additional information.

If statement code relates to **SE number**, then this field must (only) contain the **SE number**.

If statement code relates to an "other guarantee form", then this must contain information or identification of that guarantee.

Rules/codes/other relevant information:

For rulecodelist information, see rulecodelist excel sheet found on GitHub

If an **ID** (13 03 017 000) is provided, the **Name** (13 03 016 000) and **Address** (13 03 018 000) including child elements shall be omitted. If *no* **ID** (13 03 017 000) is provided the before mentioned elements is required.

Consignee (13 03 000 000):

This element and sub elements can be supplemented and estimated.

ID (13 03 017 000):

EORI number of the consignor.

Third party country unique ID code available to the union.

EU formatting requirement: 2 upper case letters followed by a string with length between 1 and 15 characters.

Name (13 03 016 000):

Enter the full name of the party

City (13 03 18 022) - Child element of Address (13 03 018 000):

City name of consignee

CountryCode (13 03 018 020) - Child element of Address (13 03 018 000):

Country code that refers to the country of the consignee. EU formatting requirement: only uppercase letters are accepted. For Codelist information, see codelist excel sheet found on <u>GitHub</u>

Line (13 03 018 019) - Child element of Address (13 03 018 000):

Street name and number of the facility or building

PostCodeID (13 03 018 021) - Child element of Address (13 03 018 000):

Postcode of the consignee

For $13\ 03\ 016\ 000$, $13\ 03\ 018\ 000$ footnote [6] applies to B1 and C1 declarations.

Description:

ID, name and address of the person or company exporting the goods.

Exporter and declarant can be the same.

Rules/codes/other relevant information:

For rulecodelist information, see rulecodelist excel sheet found on GitHub

The required information is specified by the EORI number given in ID (13 05 017 000):

It is optional to declare Name (13 05 074 016). If declared all subfields must be filled, and both a **TypeCode (13 05 074 076)** and **ID (13 05 074 075)** is required, see XML-examples below.

The **TypeCode** (13 05 074 076) indicates if it an e-mail address or a telephone number, and uses the following codes:

- 'EM' E-mail address
- 'TEL' Telephone Number

It is possible to declare up to 9 Contacts.

If Name uses the special character &, it should be declared as &

CountryCode (13 05 018 020):

EU formatting requirement: only uppercase letters are accepted. For Codelist information, see codelist excel sheet found on <u>GitHub.</u>

ID (13 05 017 000):

If this element is provided, name and address shall not be provided. This element is in general mandatory for **B1**, **C1** and **C2**. But for Denmark this element is always mandatory so name and address should never be provided.

For **Address (13 05 018 000)** footnote **[6]** applies to **B1, B2, B3, B4, C1** and **C2** declarations.

Description:

Identification of party authorized to act on behalf of another party.

Rules/codes/other relevant information:

If Exporter (13 04 000 000) and Declarant (13 05 000 000) (including all their sub-elements) are NOT identical, there must be declared a Representative/Agent.

If Agent (13 06 000 000) is provided and FunctionCode = 2 (direct representation), then the value **must be different** from **Declarant (13 05 000 000)**.

ID (13 06 017 000)

This should be the EORI number of the representative party.

FunctionCode (13 06 030 000)

This is the function / status of the representative. It can <u>only</u> be '2' (direct representation).

It is optional to declare 13 06 074 016 – Representative/Agent Contact. If filled all subfields must be filled, and both a Type-Code (13 06 074 076) and ID (13 06 074 075) is required, see XML-examples below.

The **TypeCode** (13 06 074 076) indicates if it an e-mail address or a telephone number, and uses the following codes:

- 'EM' E-mail address
- 'TEL' Telephone Number

It is possible to declare up to 9 Contacts.

For rulecodelist information, see rulecodelist excel sheet found on **GitHub**

Description:											

Description:

Information about the place where the goods are located.

Rules/codes/other relevant information:

For rulecodelist information, see rulecodelist excel sheet found on **GitHub**

Business rule in the standard product makes the GoodsLocation element mandatory always. Therefore, B1807 does not apply.

Using the relevant codes, enter the location where the goods may be examined. This location shall be precise enough to allow customs to carry out the physical control of the goods.

Only one Type of Location (16 15 045 000) is to be used at the same time.

GoodsLocation (16 15 000 000):

This data element can be **supplemented** on a supplementary declaration for **C1** declarations.

The type of location, and how it is declared, is given by the fields: TypeCode and IdentificationType. For declaring the location of goods there are predefined codes for indicating the type of location and how it is declared with specific possible values and combinations:

CountryCode (16 15 018 020):

EU formatting requirement: only uppercase letters are accepted. The countryCodes can be found here <u>Codelists - AES.xlsx</u> under sheet CL010

TypeCode (16 15 045 000)

This TypeCode Indicates the type of location where the goods will be presented.

The TypeCodes and their types of locations are:

- 'A': Designated place
- 'B': Authorised place
- 'C': Approved place
- 'D': Other

IdentificationType (16 15 046 000):

Indicates how the location will be declared:

- 'U': UN/LOCODE
- 'V': Customs Office ID
- 'W': GNSS coordinates
- 'X': EORI number
- 'Y': Authorisation number
- 'Z': Free text
- 'T': Postal code

The valid combinations for the two fields are:

- 'A' and 'U': Designated place identified by UN/LOCODE (e.g., DKCPH-0011 for Copenhagen Langelinje)
- 'A' and 'V': Designated place identified by Customs Office ID (e.g., DK007900 for Skattecenter København)
- 'B' and 'Y': Authorised place identified by Authorisation number.
- 'C' and 'Z': Approved place identified by filling in the address fields.
- 'D' and 'Z': Other place identified by filling in the address fields.
- 'D' and 'W': Other place identified by GNSS coordinates.
- 'D' and 'X': Other place identified by an EORI number.
- 'D' and 'T': Other place identified by a postal code.

Identification (16 15 047 001)

For Codelist information, see codelist excel sheet found on GitHub

Name (16 15 036 000 UN/LOCODE)

For Codelist information, see codelist excel sheet found on GitHub

- Should only be filled when IdentificationType = 'U'.

ID (16 15 053 000):

What to fill in this field is given by the Type of location, meaning that if:

- IdentificationType = 'U': this field should not be filled.
- IdentificationType = 'V': this field should not be filled.
- IdentificationType = 'W': this field should not be filled.
- IdentificationType = 'X': this field can be filled with an additional identifier to the EconomicOperator element. The EORI number itself should be filled in the identification field of the EconomicOperator element.
- IdentificationType = 'Y': the field must be filled with an <u>additional identifier</u> (also known as "adresse løbenummer") of the provided authorization.

- IdentificationType = 'Z' this field should not be filled.

The following subelements of Address (16 15 018 00) should be filled when IdentificationType = "Z":

CityName (16 15 018 022):

City name of the location of goods.

CountryCode (16 15 018 020):

For Codelist information, see codelist excel sheet found on GitHub

Line (16 15 019 00):

Street name and street number of the location of goods.

PostCodeID (16 15 018 020):

Post code of the location of goods.

The following subelements of Address (16 15 018 00) should be filled when IdentificationType = "T":

CountryCode (16 15 081 020):

For Codelist information, see codelist excel sheet found on GitHub. EU format requirement: only uppercase letters accepted.

PostCodeID (16 15 081 021):

Post code of the location of goods.

streetNumber (16 15 081 025):

Street name and street number of the location of goods.

authorisationReferenceNumber (16 15 052 000):

Authorisation number.

Should only be filled when IdentificationType = 'Y'.

CustomsOffice (16 15 047 000):

Identification (16 15 047 001):

Customs Office ID (e.g., DK007900).

Should only be filled when IdentificationType = 'V'.

See the list of Customs Office ID's here:

https://ec.europa.eu/taxation customs/dds2/rd/rd consultation location.jsp?Lang=en

Latitude (16 15 048 049):

Latitude coordinate of the location of goods.

Should only be filled when IdentificationType = 'W'.

Longitude (16 15 048 050):

Longitude coordinate of the location of goods.

Should only be filled when IdentificationType = 'W'.

EconomicOperator (16 15 051 000):

identification:

EORI number of Economic Operator.

Should only be filled when IdentificationType = 'X'.

Communication:

ID (16 15 074 075):

The phone number or email address on the contact.

TypeCode(16 15 074 076):

Code for type of communication e.g. 'TEL' for phone and 'EM' for Email.

For Codelist information, see codelist excel sheet found on GitHub

Description:

Type of goods indicated by the commodity code/combined nomenclature code.

Rules/codes/other relevant information:

Enter the combined nomenclature code part of the commodity code number corresponding to the item in question.

Commodity Code (18 09 000 000):

This element and its sub elements are allowed to be supplemented and estimated.

ID (18 09 057 000):

This is the 7th and 8th digit of the TARIC commodity code, e.g. if you have a TARIC code: 01022110, then CN = 10. TARIC codes can be found here: https://ec.europa.eu/taxation_customs/dds2/taric/taric_consultation.jsp?Lang=en NB: this field is declared differently here in Export (AES), than in Transit (NCTS). See Transit XML Guide to compare. The important part is that even though TARIC may say that the commodity code is only 6 digits, you should input '00' here in Export. Example: 442110 in TARIC does not end in '00' or any other 2 digits – in this case you still insert '00' in this field. While the format is listed as an..9, no letters should be placed in this element.

IdentificationTypeCode (18 09 057 000):

To specify Combined Nomenclature Code, input "CN"

For 18 09 000 000 footnote [2] applies to C1 declarations.

XML-examples:

<ns3:Classification>

<ns3:SequenceNumeric>1</ns3:SequenceNumeric>

<ns3:ID>10</ns3:ID>

<ns3:IdentificationTypeCode>CN</ns3:IdentificationTypeCode>
