Phase 2 – Get connected

Step 1 – Roles and Rights in DMS Import –TFE via Customer Portal

DMS Import

Onboarding mine guide for System-to-System users

Step 1

Get the right roles and rights for TFE via Customer Portal

When you have received the welcome e-mail from the technical onboarding team you can start Phase 2. If not – go to Phase 1 .

Please note that it is not possible to submit declarations through the AS4 gateway until the system user is properly set up. For the test environment the roles and rights for your system user can only be set up by the technical onboarding team and to do so, the team need the UUID of your OCES3 certificate. - we recommend you use either a VOCES or FOCES certificate

- For the test environment you have to log in to the Customer Portal and create a case, Choose the service *Notification about certificate details* – to set up the system user.

To log into Customer Portal, you have to use your Microsoft Login account. You will find the Customer Portal credential in the welcome e-mail. Learn more about Customer Portal use link below.
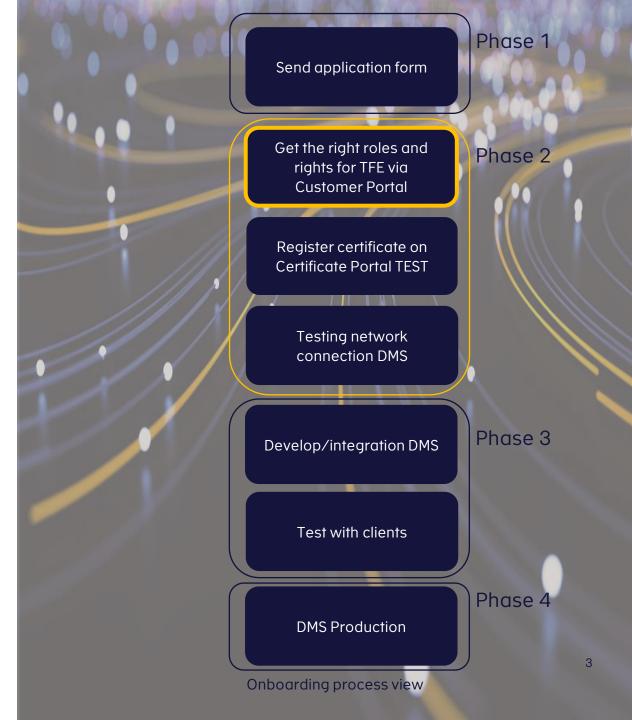

- Fill in the blanks in the template

Relevant Guides:
Login: Customer Portal
Guide: Customer Portal
For details on how to find the UUID/UI see the Connectivity Guide section 8.1.1.
