Introduction

1

This document lists the changes released to TFE environment. The changes can both be fixes or new features.

Release 4

2

2.1 Patch 4 – 25/10/23

Fixes

- Fixed validation on the field 16 15 052 000 (location of goods/ authorization) where the authorization for a place of presentation was validated wrongly.
    - Old validation: "DKYY" followed by 9 letters and/or numbers. Example: DKYY123456789 was valid but **is not anymore**.
    - New validation: "**DK**" followed by **two numbers** denoting **the year** and **1 to 13 numbers and/or letters** for identification. Example: DK23912fre43 is valid.

- Fixed validation, so Transport document ID and supporting document ID **does not have to contain "DKIPO"** when Authorization (12 12 000 000) = "DKIPO".
    - The error could be seen if the following were true:
        - Requested Procedure (11 09 001 000) = 31
        - Previous Procedure (11 09 002 000) = 51
        - Additional Procedure (11 10 001 000) = 200
        - Supporting Document ID (12 03 001 000) not starting with "DKIPO"
        - Transport document with an ID (12 05 001 000) not starting with "DKIPO"
        - A DKIPO authorisation in the field "authorisation" (12 12 000 000)

- Item codes 9930 27 00 and 9930 99 00 for nonfood provisions added to codelist CL152.
